### Ohio University Associate of Technical Study Program Pathway (AS5513)

#### Belmont College Process Control Certificate A.T.S. Professional Pathway (Type A)

If you wish to pursue a two-year program of study in a field other than those available through one of the other Ohio University associate degrees, you may design your own program of study to meet particular goals through the Associate of Technical Study (A.T.S.) Type A degree program. This program can be used to design an individualized associate degree for a specialized career objective and may recognize work previously completed in certificates. The A.T.S. is available to students registered through the Chillicothe, Lancaster, and Southern campuses.

The A.T.S. (Type A) coursework is collaboratively selected by the student and ATS advisor and may involve faculty from selected content areas as subject matter experts. A planned course of study that is approved by the faculty consists of a coherent combination of 30 credits from at least two content areas and must be aligned to meet a clearly identifiable career objective which would not be adequately addressed by an existing program. Use of transfer credit would depend on appropriateness to the career objective and as approved by the Technical Study Review Committee.

Students completing the A.T.S. may choose to continue their education with credits being selected so as to be applicable to the Bachelor of Technical and Applied Studies (B.T.A.S.) that builds their credentials to support leadership roles related to their A.T.S. field of study.

(Students using this program design generally have not earned [Ohio Career-Technical Credit Transfer \(CT\)<sup>2</sup>](#) credit that would be used in an A.T.S. (Type B) program. See Catalog for A.T.S. Type B program requirements and work with a program advisor on details.)

## Bachelor of Technical & Applied Studies Online Program Pathway

The Bachelor of Technical and Applied Studies (BTAS) degree program is designed to complement a student's previous coursework in a particular field of study or the attainment of an associate degree by studying the theory and practices that lead to organizational effectiveness. An overview of leadership principles, the use and function of work groups and teams, and why diversity benefits the organization are applied in the classroom and in a capstone experience. Students are able to customize their BTAS degree with a certificate, minor, or selected electives to complement their background, or employer/career interests without taking additional credits. The BTAS builds upon the technical skills developed within associate degree programs and/or experiences gained during employment by providing the knowledge and ability to apply the professional skills that employers seek and are necessary for career advancement.

The BTAS is a completion degree designed to follow an associate degree or the attainment of 60 credits. If needed, a student can either complete an associate degree at Ohio University or complete 60 credits with 24 credits being focused on a specified area of study. The student may formally enter the Bachelor of Technical and Applied Studies (BTAS) program after completing 60 credits.
